

Identifying Hazards Part 1

1. There are three steps in Identifying Hazards. What are they?
 - a. *Having enough knowledge to know what to look for*
 - b. *Taking the time to look for hazards with a critical eye*
 - c. *Consider what **could** happen*
2. Why is it important to look for hazards at the start of every day and at the start of every new process?
3. Why is it important to think about what could happen to others who come after you?
4. What are some examples of something that someone has done that has created a hazard for you?
5. What are some examples of something that you could do at your work area that could create a hazard for someone else?
